

November 15, 2021 – Melius Professional Consultants, Inc (MPC) announced today the award of a services contract with Georgia Power. A member of Southern Company, Georgia Power operates numerous electric generation facilities in the southeast US. This contract is being executed at the client's Plant Vogtle Units 3 & 4 project. Located in Waynesboro, GA, Plant Vogtle is one of three nuclear operating stations in the Southern Company fleet.

The scope of services for MPC is to conduct an Activity Analysis baseline for Plant Vogtle's Units 3 & 4 Project. With close to 4000 craft workers, productivity improvement has the potential to deliver big results.

Chris Buck, President of MPC, said in a statement, "We are excited to add Georgia Power to our growing list of delighted clients. Melius is uniquely qualified to not only deliver a professional study to Georgia Power, but also to show the client how the project is performing in every category versus our vast database of completed studies. Then, the real value lies in the development of an appropriate action plan that can deliver sustainable improvement and hopefully, a shortened project schedule."

Melius Professional Consultants, Inc. is a privately-held corporation with headquarters in Greenville, NC. Its mission is to help clients around the world implement sustainable improvements into their operations.
